

## How to see a doctor in Shanghai

Nowadays, the out-patient clinic center (or special out-patient clinic) are set up in almost big hospitals in Shanghai. They are the main points for the foreigners (including people come from Hongkong, Taiwan, Macao and students abroad). Besides, there're several centers special for the "little foreigners", such as XinHua hospital, it supports service to the youngsters whose age are from 0-18. A lot of foreigners are familiar with the centers of Huashan Hospital, Ruijin Hospital, Zhongshan Hospital, etc. They're the old and famous hospital in Shanghai and appointed by many consulates, multinationals, International hospitalization insurance institutions. All of them are 24 hours at working, no break in the year. You can make an appointment through their hot line at home; the guiding nurse will inquire you about the situation. Go to hospital, don't forget to take the valid personal certificate, like passport. The special out-patient clinic is much more expensive than the normal one, but if you have relative medical insurance, it could be saved a lot.
