

Car Rental Service for Visiting Factories and Suppliers

After your arrival in Shanghai, are you in need of visiting factories in Jiangsu or Zhejiang with developed manufacturing industries? China Business Engine will provide you with “PA&CAR” service to meet your need. We not only arrange the most suitable business personal assistant with rich experience in visiting local suppliers according to your schedule, but also rent a car with a local driver on call to save your time and energy.

Consider the cost and efficiency of business trip, we give our advice as follows:

1. In China, car rental and toll for a whole day is not so cheap. If there is less than 4 people in your group, the cost shall be higher than that for you taking train or long distance bus. However, you can arrange your trip with great flexibility and save the time. It all depends on what you care.
2. Choose the right type of car. In China, the following two types of cars are popular for short distance business trip: PASSAT and BUICK GL8.

PASSAT

BUICK GL8

PASSAT has 5 car seats. Besides the seats for the driver and the business PA, there are 3 seats for you. It is applicable to small groups.

BUICK GL8 can seat 7 to 8 people and is applicable to medium-sized groups.

*The rental fee for the abovementioned two types of cars is basically the same. According to your requirement, we can arrange Benz and Audi and other luxurious cars as well as travel bus with 18 to 35 seats.

3. Compare the cost of car rental. The way you rent the car directly influences the rental fee. One is rent the car with limited miles and time. For example, “8 hours and 100 Km” is applicable to really short distance trip (e.g. trip in Shanghai). However, if you are going to Zhejiang or Jiangsu, it is not cost-effective for you to choose this way. If you are not sure about the distance and the expected time for the trip, we strongly recommend the way of renting the car with no limitation of distance and time. Moreover, we will calculate the toll fees, insurance of the trip and provide you the final quotation with transparency.

4. Problems you may encounter for car rent. Usually you only need to order our “PA&CAR” service 2 days prior to your trip. But on occasions of the holidays in China (<http://www.cbize.com/upload/document/pa%20working%20hours.pdf>), there are lots of people renting car for tour, and there is a shortage of supply. So you need to order the service 3 to 5 days prior to the trip.
