

### **Let Your Personal Assistant Contact the Local Suppliers**

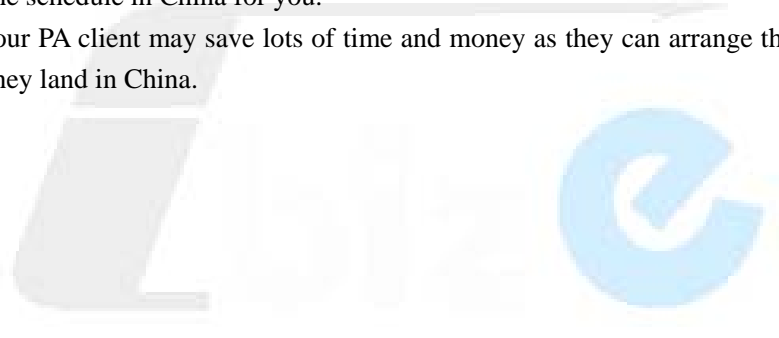

Although there are lots of local suppliers in China with products of good quality and low price, it is not easy to find the most suitable supplier. As most of the local suppliers have no introduction or specifications in English, there must be lots of problems in the communication between you and the local suppliers.

It is wise for you to find a personal assistant who knows the industry and the enterprises to help you achieve your goal.

China Business Engine has helped numerous clients under this circumstance. Some of our clients may log on our website and find the suitable personal assistant or directly ask us to recommend one before they come to China. After you have ordered the service, the personal assistant may conduct the following preparations for the work:

- (1). Make the airport tickets and hotel reservation or rent car and meeting room according to your budget and working place.
- (2). Select the suitable local suppliers, get the contact number and even some of the quotations.
- (3). Make the schedule in China for you.

Therefore, our PA client may save lots of time and money as they can arrange their work in order as long as they land in China.
